翻新工程
Stone Restoration

形象提升

- 翻新護理服務能減少石材高低不一及藏污納垢而影響觀瞻的問題
- 專業的打磨修繕，效果必定煥然一新，即時提升華麗氣派的形象
- 即時回復地板光澤及美觀度令原有的裝修歷久常新

Image Enhancement

- Remove the scratches and uneven of tile edges
- Professional treatment builds elegant image
- Restore the gloss of tiles and long lasting

效果煥然一新
Restore up to 90% of the Original Condition

有效控制成本

- 減低重新鋪設石材的工程成本
- 由於施工時間靈活、可分區域進行、亦不會製造大量噪音及泥塵，因此商業活動可如常進行
- 晶硬護理有效地減低維修及保養的成本

Cost Effective

- Cost-saving of replacement of tiles
- Minimize interruption of regular business
- Reduce frequent repair and maintenance cost

回復地板光澤
The Polished Floor had a Good Shine

石材無縫處理
Stone Revamp

一般石材隙縫會用填縫粉作填縫，但一段時間後填縫粉會做成缺口、外觀不潔甚至病變，使用史偉莎無縫處理不但新舊石材均可，而且利用石材膠填補及打磨使縫隙與石材成一水平，這樣便能解決藏污納垢及石材高低不平的問題。

The normal method of filling stone seam with sealing powder is not ideal since sealing powder is easily stained and cracked, causing the marble looks dirty and has short lifespan.

Swisher Stone Revamp can fill the seam and crack out, the slab looks like one seamless piece of stone. Colour matching is also available depending on the types of stone.

石材翻新服務
Stone Restoration

當石材出現病變時，想維修又怕影響營業及需付上數十萬元的裝修費。這時候史偉莎的材石翻新服務便能解決這些煩惱，因為翻新期間不但可以照常營業，而且價錢比裝修費更便宜，石材翻新後更可回復九成或以上新一樣的感覺。

Swisher's Stone Restoration is using the latest technologies and materials (metal-bonded & diamond grit) to remove deep scratches and uneven tile edge. Processing stone restoration does not influence daily business activities, which is cost effective and efficient as well as restoring up to 90% of the original condition.

石材護理 (晶硬)
Stone Protection (Crystal Hardening)

晶硬護理是現時最恰當的石材護理。因為石材打臘是用拋光機上臘，這樣不但容易滑倒，而且上了數次臘後便要用起臘水把舊有的臘起去及重新上臘。但史偉莎的晶硬護理是在進行晶硬處理時噴灑加光劑及加硬劑，此舉能讓石材表面形成一層堅硬的水晶保護以達至高光澤度、防水及防污的作用。

Swisher provides Periodic Stone Protection, which applies polishing of floor that creates skid-proof and long-lasting effect. Swisher's crystal hardening agent is a mixture of stone powder and crystal hardener treated under high heat. Polishing is the process that will create the mirror like finish of stone surfaces and it can provide a solid protection of the stone.

石材護理 (光粉)
Stone Protection (Recrystallizing)

光粉護理比晶硬護理收費相對便宜而且能夠修補輕度花痕、清除哄漬及回復一定的光澤。但石材的防護表面損耗會比晶硬護理快。

Comparing to crystal hardening agent, re-crystallizing is relatively cheaper and it can removes light scratches. However, the re-crystallizing on stone has shorter shelf life than hardening method.
